

Certifies that

VAN DER LUYT

has saved at least 252 tonnes of CO₂ in 2010
by choosing to cross the Channel with Eurotunnel.

Thank you for sharing our continued commitment to protect the environment,
we are proud to be associated with your business.

Jacques Gounon
Chairman and Chief Executive

With the environmental strength of its rail infrastructure, Eurotunnel is recognised as the most environmentally friendly means of cross Channel transport. Sustainable development, waste management, renewable energy and biodiversity illustrate Eurotunnel's lasting commitment to a greener future.

50% of waste produced by Eurotunnel is recycled

260 000 litres of fuel is saved each year
with new hybrid works trains

Wind farms on Eurotunnel
Coquelles Terminal
generate electricity to power
equivalent of 2000 homes
